BEST!

We focus on providing natural results and avoiding artificial-looking outcomes . We are proud to be one of the top aesthetic injectable practices in the nation. We aim to provide care in a cozy setting with the friendliest, most qualified staff.

CHAPTER 1

WRINKLE
SOFTENERS
AND DERMAL
FILLERS

WRINKLE SOFTENERS

If you are unhappy with the appearance of aging or you want to prevent current lines for worsening, maybe it is time you experience wrinkle softeners treatments with BOTOX® and Dysport®.

What are wrinkle softeners?

Wrinkle softeners are injectable solutions that are designed to soften or reverse the appearance of fine lines and wrinkles. The medicine works by relaxing the muscles under the skin that cause the wrinkles to appear on the skin.

What is BOTOX® and Dysport®?

BOTOX® and Dysport® are FDA-approved medicines for the use of softening or eliminating wrinkles.. BOTOX® and Dysport® are also great at preventing the development of further fine lines on your skin.

Results from wrinkle relaxes can last from three to six months, and multiple treatments over time are suggested in order to maintain maximum results. You will start enjoying results within 10 days after treatment.

DERMAL FILLERS

Juvéderm® Restylane® and Versa®

Dermal fillers are made up of Hyaluronic Acid (HA). HA is naturally found in your body and draws water into the tissues, plumping them and easing out saggy skin. The results of dermal filler injections can be seen immediately.

Typically once you have achieved the desired look, you will not require a second procedure for nine to twelve months, sometimes longer. There is no downtime, other than bruising, you can resume normal activities the same day.

Dermal Fillers can significantly improve:
Fine Lines | Deep Facial Creases |
Nasolabial Folds | Marionette Lines
| Volume Loss in Cheeks and
Across Jawline | Thin Lips

DERMAL FILLERS: Lip Fillers

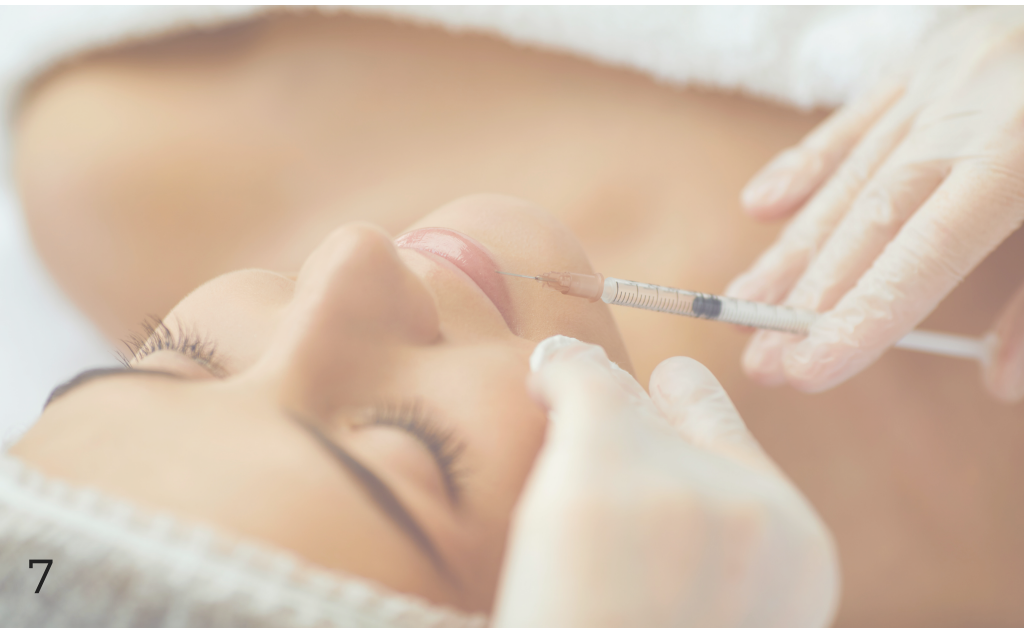

Lip fillers add volume, shape and reduce fine lines in and around the lips.

What are lip fillers?

Lip fillers are dermal fillers. Most brands of lip filler such as Juvederm® and Restylane® are made of hyaluronic acid (HA), which is a substance that is naturally found in the body.

When can I expect to see results from my lip fillers?

Most people see immediate results but will look swollen for a few days. The best results are seen a few weeks following the initial treatment. Most patients are able to enjoy their newly enhanced lips for up to a year, it just depends on your needs and goals.

DERMAL FILLERS: Biostimulators

Sculptra® and Radiesse®

Sculptra® uses poly-L-lactic acid, or PLLA, to stimulate collagen production in the body and face to restore volume. Radiesse uses calcium hydroxy appetite. They both work by stimulating your body to produce its own collagen, giving very natural-looking and long-lasting results.

There is no downtime associated with biostimulators..

Fillers can help with collagen production to reduce the appearance of concerns like:

Cheek | Marionette Lines |
Nasolabial Folds Smile Lines | Hollow
areas | Butt sagging |
Cellulite | Crepey skin

At BEAUTIFY we offer our **Non-Surgical Butt Lift**, this quick and minimal pain procedure involves adding volume and lift to the buttocks or shaping the hips using Radiesse. This can also treat cellulite!

Beautify Face Lift

Using bio-stimulating agents, we can help collagen grow and revamp the lower face; giving the appearance of a more youthful look.

Treatment areas include:
Cheeks | Nasolabial folds | Chin
| Marionette lines | Jawline.

Beautify Glow Treatment

Our Beautify Glow is a special mix of tox and filler is injected with tiny needles all over the face. It is used to diminish sweating and oil in the face, reduce fine lines/wrinkles, draw hydration in to the skin, and produce a glowy, dewy appearance. Results last around 30-45 days or more.

CHAPTER 2

SKIN CARE

Skincare Products

BEAUTIFY features medical-grade products that you can use at home to destroy bacteria, clean deeply, speed healing and reduce breakouts on blemish-prone or troubled skin.

"The Perfect Cleanser"

This azelaic acid cleansers brightens and sloughs off dead skin, pH balanced so the rest of your products work their best and you avoid aging and acne! This cleanser is also Paraben/Sulfate free!

"Paragon Moisturizer"

High purity extract specifically developed for combating the irritation caused by alpha hydroxy acids and retinoids. Increase skin moisture level by 150% after 24 hours.

"The Perfect Body Lotion"

15% Glycolic Acid, which exfoliates and brightens skin. Master antioxidant Glutathione lightens pigmentation, and retinol increases cellular turnover for smoother, firmer, youthful skin.

"The Perfect A"

Increases cellular turnover, thus improving skin tone and texture. Treats wrinkles, acne and sun damaged skin. Areas include: face and chest.

"The Perfect C"

Protects skin cells and skin's support structure from UV-related damage, reduces inflammation, promotes collagen production and reduces sun spots.

Chemical Peels

If you are unhappy with your wrinkles, discolored skin, or scars, maybe its time for you to try a chemical peel. A chemical peel is a procedure in which a chemical solution is applied to the skin to remove the top layers. The skin that grows back is smoother.

At Beautify, we offer two different peels. The **Perfect Derma Peel** is a medical grade chemical peel that will rejuvenate your skin, leaving it looking younger and healthier after just one application.

The **Jessner Peel** is a medium-depth chemical peel that exfoliates the skin's outer layer in order to create a smoother, fresher appearance, with improved tone and texture.

Our Peels Treat:

- Acne and acne scarring
- Fine lines and wrinkles
 - Age and sun spots
 - Hyperpigmentation
 - Enlarged pores
 - Oil balancing
- Overall skin health

Microneedling

Microneedling is a minimally invasive, non-surgical treatment designed to enhance production of collagen.

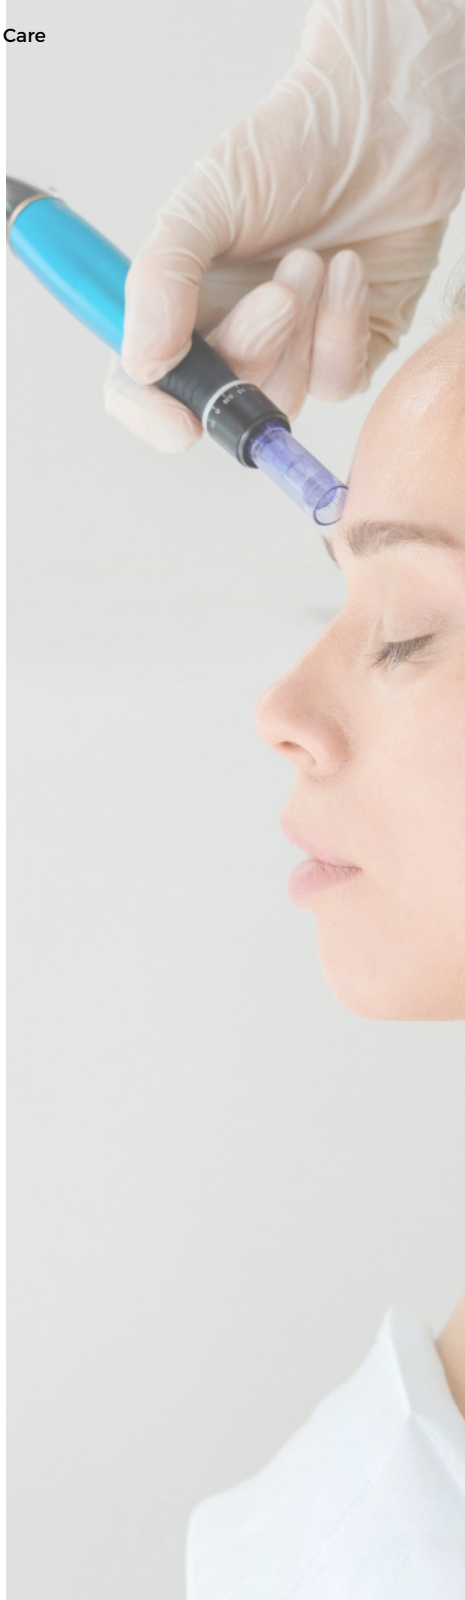

Microneedling can lessen the appearance of sun damage, acne scars, and hyperpigmentation.

It can also correct the appearance of common cosmetic concerns such as:

Fine lines | Wrinkles | Acne Scars |
Uneven Texture | Dull Skintone

Dermaplaning

Dermaplaning is a type of exfoliation that removes the top layer of dead skin cells and peach fuzz to reveal a smoother, brighter complexion. This procedure helps with better absorption of skincare products making them more effective and smoother application of makeup.

Chapter 3

Body

What is Kybella?

Kybella is an injectable treatment option that directly targets and destroys stubborn fat under the chin. This non-surgical, minimally invasive treatment can help enhance the appearance of the neck or jawline and create a more defined appearance.

Treatment areas include:
Chin | Bra Bulges | Inner Thigh
Fat | Belly Fat

Subcision for Acne Scars

With your face numbed by either cream or a local anesthetic, a needle is inserted underneath the skin, below the scar tissue, and run from side to side, beneath the surface of the skin. This breaks the connective tissue holding the scar to the undamaged skin below, encouraging the skin to regenerate, and eventually promote new collagen growth, which lifts that depression in the skin causing the scar.

Sclerotherapy

What is it?

Procedure used to treat varicose veins and "spider veins."

How is it done?

A solution is injected directly into a vein, causing the lining of the blood vessel to swell and stick together. Over time, the vessel turns into scar tissue that fades from view.

Lipo Fat Burning Shot

What is it?

The Lipo Fat Burning Shot promotes fat burning in patients. In combination with a healthful diet and regular exercise, people who use these injections should lose fat more easily

What's in it and how does it work?

Our fat burning shots contain Vitamin B-12, which is an important nutrient required for reactions in the body that regulate fat and protein metabolism.

At Beautify, our number one goal is to make you LOOK your best, so you can FEEL your best!
